This valuable work published in September 2000 provides a comprehensive review of the environmental condition of the seas of the world sea by sea and region by region. It focuses on all aspects of man's interactions with the seas and with their biological and physical systems. The three volumes of *Seas at the Millennium: an Environmental Evaluation* cover issues of global and regional importance such as biological description of the coast and continental shelf. E. Naylor, School of Ocean Sciences, University of Wales Bangor, U.K. The editor and authors are to be congratulated for their achievement in compiling these volumes which offer a wealth of well-sourced information and ideas as a basis for further debate.
