From Academic Press : Fish Physiology: Primitive Fishes, Volume 26 Fish Physiology: Primitive Fishes, Volume 26:

Primitive fishes are a relatively untapped resource in the scientific search for insights into the evolution of

physiological systems in fishes and higher vertebrates Volume 26 in the Fish Physiology series presents what is known about the physiology of these fish in comparison with the two fish groups that dominate today the modern elasmobranchs and the teleosts Chapters include reviews on what is known about cardiovascular nervous and ventilatory systems About the Author Tony Farrell is a graduate of Bath University where he was fortunate to study with Peter Lutz His fortunes grew further when he moved in 1974 to Canada and the Zoology Department at the University of British Columbia to complete his Ph D degr
