By Barry Barnes, John Dupré : Genomes and What to Make of Them all refseq archaeal and bacterial genomes with the exception of selected reference genomes are annotated using ncbis prokaryotic genome annotation pipeline this news release thursday march 29 2012 1000 genomes project data available on amazon cloud project is exemplar of new white house big data initiative Genomes and What to Make of Them:

In 2003 the Human Genome Project announced that it had achieved a stunning scientific breakthrough the full map of the human genome and with it our first complete picture of the basic building block of human life Since then boasts about the benefits and warnings of the dangers of genomics have remained front page news Barnes and Duple drawing on both science and the philosophy of biology push beyond the hype that accompanied the dawn of genomics There has been too much attention devoted to what genomics will and will not do and soon But beneath the su
