claussen k zimmerman jl 2004 genotypic differences in the heat shock response and thermotolerance in four potato
cultivars plant sci 166901 911 google Root and Tuber Crops (Handbook of Plant Breeding):

It is important to include Tuber and Root Crops in the Handbook of Plant Breeding They include starchy staple crops
that are of increasing importance for global food security and relief of poverty important millennium goals for the
United Nations Indeed 2008 was the UN International Year of the Potato in recognition of this role of the potato as the
world rsquo s third most important food crop after wheat and rice The other major staples are cassava sweetpotato and
From the Back Cover Root and Tuber Crops John Bradshaw Editor A number of root and tuber crops were first
domesticated several thousand years ago but none became important on a global scale until after the end of the 16th
century Today the potato is the world
