By Ted G. Lewis : Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation

critical infrastructure protection in homeland security defending a networked nation 2nd edition critical infrastructure protection in homeland protection in homeland security defending a networked nation edition 1 a scientific approach to the new field Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation:

1 of 1 review helpful Decent textbook for advanced learners in the field awful for entry level college students By Rebekah This textbook is long occasionally rambling and at times focuses more on the author s personal beliefs and views on where the United States needs to be versus where they are The author is also inconsistent with his presentation of facts For example he states that FEMA was established i A scientific approach to the new field of critical infrastructure protection This book offers a unique scientific approach to the new field of critical infrastructure protection it uses network theory optimization theory and simulation software to analyze and understand how infrastructure sectors evolve where they are vulnerable and how they can best be protected The author demonstrates that infrastructure sectors as diverse as water power ene excellent for use as a text in information assurance or cyber security courses I strongly advocate that professors examine this book with the intention of using it in their programs Computing s com March 22 2007 The book is written as
