**From University of California Press : Human Impacts on Ancient Marine Ecosystems: A Global Perspective**  
the human impact on natural ecosystems has reached dangerous levels even significantly altering the earth's basic chemical cycles climate change and human health risks and responses editors aj mcMichael the Australian National University Canberra Australia dh Campbell Lendrum Human Impacts on Ancient Marine Ecosystems: A Global

Perspective:

0 of 0 review helpful Very important book on marine resources By E N Anderson This is a very important book and I am surprised to see no one has reviewed it yet It is a collection of major archaeological studies that assess the impact of humans on fish shellfish seabirds and sea mammals in prehistoric and early historic times Studies cover several key areas including New Zealand the Caribbean islands the Califor Archaeological data now show that relatively intense human adaptations to coastal environments developed much earlier than once believed mdash more than 125 000 years ago With our oceans and marine fisheries currently in a state of crisis coastal archaeological sites contain a wealth of data that can shed light on the history of human exploitation of marine ecosystems In eleven case studies from the Americas Pacific Islands North Sea Caribbean Europe and Afr ldquo This groundbreaking lsquo must read rsquo book will serve as the prelude for understanding how the world rsquo s modern marine ecosystems have been so severely impacted by humans rdquo
