By Alan Judd, Martin Hovland : Seabed Fluid Flow: The Impact on Geology, Biology and the Marine Environment most forage fish are filter feeders for example the atlantic menhaden a type of herring lives on plankton caught in midwater adult menhaden can filter up to four mud volcanoes and evaporite seismites in a tidal flat of northern kuwait implications for fluid flow in sabkhas of the persian arabian gulf Seabed Fluid Flow: The Impact on Geology, Biology and the Marine Environment:

1 of 1 review helpful A great Introduction and reference book By leslie o baksmaty Well written multidisciplinary text with balanced emphasis on chemistry biology and physics of natural seepage Encyclopedic array of examples and data from around the world including references 3 of 3 review helpful Amazing Book By M Barry Judd and Hovland do a great job of explaining Seabed fluid flow involves the flow of gases and liquids through the seabed Such fluids have been found to leak through the seabed into the marine environment in seas and oceans around the world from the coasts to deep ocean trenches This geological phenomenon has widespread implications for the sub seabed seabed and marine environments Seabed fluid flow affects seabed morphology mineralization and benthic ecology Natural fluid emissions also have a significant I found the book to have significant breadth and detail and believe it will be of use to scientists in both academia and industry Geofluids If you ask yourself Do I need the update if I have the 1988 version of the book the answer is yes Wh
