By Christopher S. Lobban, Paul J. Harrison : Seaweed Ecology and Physiology amazon seaweed ecology and physiology 9780521145954 dr catriona l hurd paul j harrison kai bischof christopher s lobban books a rewritten and reorganized edition of the physiological ecology of seaweeds 1985 this book contains a new introductory chapter reviewing seaweed morphology Seaweed Ecology and Physiology:

8 of 11 review helpful Great for Algae students By A Customer I purchased this book because I was frustrated with the textbook in my algae class I found this book to be both helpful and informative It is not a difficult read and the authors didn't use a lot of technical words just to prove they knew them Tons of great information A rewritten and reorganized edition of The Physiological Ecology of Seaweeds 1985 this book contains a new introductory chapter reviewing seaweed morphology cytology life histories and an expanded treatment of tropical seaweeds The final chapter on mariculture is much larger and includes a case study on how principles of physiological ecology were applied in developing the carrageenan industry Also contains an appendix summarizing the taxonomic position and nomenclature
