Don't think a book can take you on the Ultimate Field Trip. Think again. Imagine going on a week-long exploration of the Bay of Fundy off the coast of Maine to play with the puffins, sun with the seals, and get an up-close look at what life is like underwater. One group of middle school kids actually made the journey, and this book allows you to join their field trip without getting slimed by seaweed. A fascinating firsthand account of the scene. From School Library Journal Grade 5-8A description of a week-long excursion made by a group of Boston middle school students to the Bay of Fundy in Maine. The narrative alternates between their conversations which reflect their exuberant reactions to everything.
