0 of 0 review helpful The book itself was excellent but the DVD that should have come with the By Roger H Evans The book itself was excellent but the DVD that should have come with the book according to the description was missing I assumed that it was being sent separately but it has never been sent As this was a gift to our son in law whom is a marine biologist and university lecturer it spoilt the present Although they cover only one percent of the Earth s surface reefs are home to more than 25 percent of all marine fish species They are the largest living structures on the planet created over millennia by countless tiny organisms Reef is your opportunity to discover some of the most incredible wildlife habitats on the planet Coral reefs are often called the rainforests of the sea because of the quantity

and diversity of life they support and because they About the Author Scubazoo is a dedicated team of divers photographers marine biologists and conservationists who have devoted their lives to the filming and preservation of reefs worldwide Their work includes filming for productions broadcast on National Ge
