0 of 0 review helpful How to think like a marine biologist By eb Reading Michael Konrad s book is like going on a

scientific expedition What you re exploring is accessible to all of us who live near the water it s all the life in and around a dock and there might be one just around the corner This one is in the San Francisco Bay but the way the author looks at it could be applied anywhere and even to a little commu This book is an informal introduction to marine biology using life on and near a floating dock in a ocean estuary as examples We look at large and small animals and plants and follow the development of several species from egg to adult Who eats who defines food chains in the Dock ecology A major theme is that diversity and total mass increases as the size of organisms decrease small is where the action is Anyone can look under the Dock and see their own special comm
