By Jean Berthier, Kenneth A. Brakke, Erwin Berthier: Open Microfluidics microfluidics and nanofluidics is an international peer reviewed journal exploring all aspects of microfluidics nanofluidics and lab on a chip science and technology 4bio microfluidics congress synopsis microfluidics continues to be an exciting and rapidly developing area in the life sciences with a continually expanding range Open Microfluidics:

Open microfluidics or open surface is becoming fundamental in scientific domains such as biotechnology biology and

space First such systems and devices based on open microfluidics make use of capillary forces to move fluids without any need for external energy Second the Idquo openness rdquo of the flow facilitates the accessibility to the liquid in biotechnology and biology and reduces the weight in space applications This book has been conceived to
