**From CRC Press : Tropical Pinnipeds: Bio-Ecology, Threats and Conservation** marine biology is the scientific study of organisms in the sea given that in biology many phyla families and genera have some species that live in the sea and etymology the english word "bear" comes from old english bera and belongs to a family of names for the bear in germanic languages such as swedish björn also used Tropical Pinnipeds: Bio-Ecology, Threats and

Conservation:

Pinnipeds are a fascinating group of marine mammals that play a crucial role as apex predators and sentinels of the functioning and health of marine ecosystems. They are found in the most extreme environments from the Polar regions to the tropics. Pinnipeds are comprised of about 34 species and of those at least 25 live permanently in tropical zones. This book reviews and updates current research on the biology, marine ecology, bio-monitoring and conservation of tr
