By George Maul : The Oceanographer's Companion: Essential Nautical Skills for Seagoing Scientists and Engineers The Oceanographer's Companion: Essential Nautical Skills for Seagoing Scientists and Engineers:

Scientists and engineers embarking on their first voyage for oceanographic or meteorological research are often unprepared for the experience. Going to sea involves learning a new language — that of the seaman. This is necessary for clear communications for the safety and well being of the members of the scientific party and the ship's crew. The Oceanographer's Companion is intended to familiarize a student with the basics of navigating. This is the equivalent of a detailed oral history of practical knowledge about conducting all manner of sea going oceanographic fieldwork — transcribed, organized and indexed in a comprehensive volume. Written for students of oceanography or interest.
