The world's stocks of wild fish continue to decline making the task of finding innovative sustainable and socially acceptable methods of fisheries management more important than ever. Several new approaches from around the world have proved to be successful in stemming the decline whilst increasing fish catches and under the editorship of McClanahan and Castilla this international team of authors have looked to these examples to provide a remarkably well balanced and objective publication. *Ausmarine* A remarkably well balanced and objective publication. *Ausmarine* From the Back Cover
