0 of 0 review helpful Five Stars By Nathan Great workbook Very easy to follow and teaches really valuable skills This book is the seventh companion volume to 'An Introduction To Using GIS In Marine Biology' It is designed to augment the information on using GIS in marine biology provided in that book and indeed to be used alongside it

rather than to be used independently as a stand alone volume Therefore this book will be of most interest to those who have already read 'An Introduction To Using GIS In Marine Biology' This supplementary work About the Author Dr Colin D MacLeod has more than twenty years experience as a marine biologist working with whales and dolphins seabirds and squid He has also spent over a decade working with geographic information systems GIS and teaching marine biologists
