By Jean-Pierre Debenay : A Guide to 1,000 Foraminifera from Southwestern Pacific, New Caledonia A Guide to 1,000 Foraminifera from Southwestern Pacific, New Caledonia:

0 of 0 review helpful Excellent in All Aspects By J Stedman Designed for the amateur and professional scientist alike

the Guide served this amateur well The descriptions of the different foraminifera species are clear and detailed and the pictures are superb with a most helpful photographic summary that nicely supports the identification process Though targeted at the taxa found around New Caledonia the Guide is m Numbering nearly ten thousand species Foraminifera constitute the most diverse group of shelled microorganisms in the ocean They are also one of the most valuable tools for environmental assessment and monitoring programs This guide by Jean Pierre Debenay provides a description of the environmental conditions around New Caledonia an accessible introduction to Foraminifera and a summary of the research that has been carried out from the island nation It also de About the Author nbsp Jean Pierre Debenay is research director emeritus at the Insitut de recherche pour le d eacute veloppement in Montpellier France
