**By Jean-Michel Kornprobst : Encyclopedia of Marine Natural Products** natural resource is any naturally occurring substance or feature of the environment physical or biological that while not created by human effort can be exploited petroleum in one form or another has been used since ancient times and is now important across society including in economy politics and technology Encyclopedia of Marine Natural Products:

Now in its second edition and further expanded by 15 this encyclopedic work is one of the largest resources on marine natural products It contains an exhaustive and systematic listing of more than 9 000 formulae and 10 000 references with around 650 relevant websites The unique approach of classifying the compounds by biological species together

with their background information makes this particularly useful for marine biologists and contributed significantly  
ldquo The set will be of interest to pharmacists biochemists and biologists It is good value for money To find this  
information from other online sources would cost far more and one would still have to sort and collate it rdquo nbsp
