From Brill Academic Pub : The Freshwater Fishes of Suriname (Fauna of Suriname) 33600 species 319100 common names 58300 pictures 54100 references 2290 collaborators 600000 visitsmonth vietnam mammals found only in vietnam include the tonkin snub nosed monkey delacours langur the hatinh langur the gray shanked douc The Freshwater Fishes of Suriname (Fauna of Suriname):

4 of 7 review helpful Horrible binding By A reader Binding is ridiculous particularly for a book at this price that should be meant for fieldwork It started to fall apart almost immediately Text is outdated and photos are about 50 preserved museum specimens and do nothing for identification purposes Somebody needs to do something better than this print on demand rubbish With some 480 currently known fresh and brackish water fish species Suriname has a rich inland fish fauna that is related to the most diverse freshwater fish fauna on planet Earth i e that of the Amazon River Interest in the freshwater fishes of Suriname by naturalists and scientists extends back over more than two centuries Suriname is undoubtedly the site of origin of the oldest extant preserved specimens of South American fishes and 19 Surinamese fish species we The freshwater fishes of Suriname est un ouvrage de grande utilite a la fois pour les scientifiques et les gestionnaires des milieux aquatiques Les scientifiques y trouveront les donnees essentielles pour la comparaison des peuplements ichtyologiques dans
